

FREQUENTLY ASKED QUESTIONS ABOUT SPORTS PHYSICALS

1. Why do I need a sports physical?

All student-athletes are required by the PIAA (Pennsylvania Interscholastic Athletic Association) to have a physical examination prior to participation in any school sponsored athletic activity.

2. When and where are sports physicals?

Sports physicals are typically offered at the Lampeter-Strasburg High School on the first Saturday in June. This is the ONLY time that sports physicals will be offered at L-S for the forthcoming school year.

3. How much does an L-S sponsored sports physical cost?

\$10.

4. How long is a sports physical valid?

Physicals for the forthcoming school year must take place on or after June 1. Physicals completed before June 1 will not be accepted. A sports physical is valid from the date the doctor signs it until the following May 31.

5. Can I go to my own doctor for the sports physical?

Yes.

6. What is a CIPPE form?

CIPPE stands for Comprehensive Initial Pre-participation Physical Examination.

7. Can I use a different form?

No. The PIAA requires all student-athletes to use the CIPPE form.

8. Will I need another sports physical for a winter or spring sport?

No. Once a completed CIPPE form (sections 1-6) is on file, a second physical is not needed. However, a re-certification form will be required.

9. What is a re-certification?

Re-certification is required for all student-athletes participating in subsequent sports in the same school year, or if the initial sports physical took place earlier than 6 weeks prior to the start of the winter or spring sports season.

CIPPE Section 7 Parent/Guardian Re-certification Form

This is required for ALL athletes whose sports physical took place on or after June 1 but earlier than six weeks prior to the start of the winter or spring sports season.

CIPPE Section 8 Doctor Re-certification Form

This is ONLY required for athletes who see a healthcare provider for an injury or illness occurring after the sports physical but prior to the start of the subsequent sports season.

**PIAA COMPREHENSIVE INITIAL
PRE-PARTICIPATION PHYSICAL EVALUATION**

INITIAL EVALUATION: Prior to any student participating in Practices, Inter-School Practices, Scrimmages, and/or Contests, at any PIAA member school in any school year, the student is required to (1) complete a Comprehensive Initial Pre-Participation Physical Evaluation (CIPPE); and (2) have the appropriate person(s) complete the first six Sections of the CIPPE Form. Upon completion of Sections 1 and 2 by the parent/guardian; Sections 3, 4, and 5 by the student and parent/guardian; and Section 6 by an Authorized Medical Examiner (AME), those Sections must be turned in to the Principal, or the Principal's designee, of the student's school for retention by the school. The CIPPE may not be authorized earlier than June 1st and shall be effective, regardless of when performed during a school year, until the latter of the next May 31st or the conclusion of the current spring sports season.

SUBSEQUENT SPORT(S) IN THE SAME SCHOOL YEAR: Following completion of a CIPPE, the same student seeking to participate in Practices, Inter-School Practices, Scrimmages, and/or Contests in subsequent sport(s) in the same school year, must complete Section 7 of this form and must turn in that Section to the Principal, or Principal's designee, of his or her school. The Principal, or the Principal's designee, will then determine whether Section 8 need be completed.

B. **Understanding of eligibility rules:** I hereby acknowledge that I am familiar with the requirements of PIAA concerning the eligibility of students at PIAA member schools to participate in Inter-School Practices, Scrimmages, and/or Contests involving PIAA member schools. Such requirements, which are posted on the PIAA Web site at www.piaa.org, include, but are not necessarily limited to age, amateur status, school attendance, health, transfer from one school to another, season and out-of-season rules and regulations, semesters of attendance, seasons of sports participation, and academic performance.

Parent's/Guardian's Signature _____ Date ____/____/____

C. **Disclosure of records needed to determine eligibility:** To enable PIAA to determine whether the herein named student is eligible to participate in interscholastic athletics involving PIAA member schools, I hereby consent to the release to PIAA of any and all portions of school record files, beginning with the seventh grade, of the herein named student specifically including, without limiting the generality of the foregoing, birth and age records, name and residence address of parent(s) or guardian(s), residence address of the student, health records, academic work completed, grades received, and attendance data.

Parent's/Guardian's Signature _____ Date ____/____/____

D. **Permission to use name, likeness, and athletic information:** I consent to PIAA's use of the herein named student's name, likeness, and athletically related information in video broadcasts and re-broadcasts, webcasts and reports of Inter-School Practices, Scrimmages, and/or Contests, promotional literature of the Association, and other materials and releases related to interscholastic athletics.

Parent's/Guardian's Signature _____ Date ____/____/____

E. **Permission to administer emergency medical care:** I consent for an emergency medical care provider to administer any emergency medical care deemed advisable to the welfare of the herein named student while the student is practicing for or participating in Inter-School Practices, Scrimmages, and/or Contests. Further, this authorization permits, if reasonable efforts to contact me have been unsuccessful, physicians to hospitalize, secure appropriate consultation, to order injections, anesthesia (local, general, or both) or surgery for the herein named student. I hereby agree to pay for physicians' and/or surgeons' fees, hospital charges, and related expenses for such emergency medical care. I further give permission to the school's athletic administration, coaches and medical staff to consult with the Authorized Medical Professional who executes Section 6 regarding a medical condition or injury to the herein named student.

Parent's/Guardian's Signature _____ Date ____/____/____

F. **CONFIDENTIALITY:** The information on this CIPPE shall be treated as confidential by school personnel. It may be used by the school's athletic administration, coaches and medical staff to determine athletic eligibility, to identify medical conditions and injuries, and to promote safety and injury prevention. In the event of an emergency, the information contained in this CIPPE may be shared with emergency medical personnel. Information about an injury or medical condition will not be shared with the public or media without written consent of the parent(s) or guardian(s).

Parent's/Guardian's Signature _____ Date ____/____/____

SECTION 3: UNDERSTANDING OF RISK OF CONCUSSION AND TRAUMATIC BRAIN INJURY

What is a concussion?

A concussion is a brain injury that:

- Is caused by a bump, blow, or jolt to the head or body.
- Can change the way a student's brain normally works.
- Can occur during Practices and/or Contests in any sport.
- Can happen even if a student has not lost consciousness.
- Can be serious even if a student has just been "dinged" or "had their bell rung."

All concussions are serious. A concussion can affect a student's ability to do schoolwork and other activities (such as playing video games, working on a computer, studying, driving, or exercising). Most students with a concussion get better, but it is important to give the concussed student's brain time to heal.

What are the symptoms of a concussion?

Concussions cannot be seen; however, in a potentially concussed student, **one or more** of the symptoms listed below may become apparent and/or that the student "doesn't feel right" soon after, a few days after, or even weeks after the injury.

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Bothered by light or noise
- Feeling sluggish, hazy, foggy, or groggy
- Difficulty paying attention
- Memory problems
- Confusion

What should students do if they believe that they or someone else may have a concussion?

- **Students feeling any of the symptoms set forth above should immediately tell their Coach and their parents.** Also, if they notice any teammate evidencing such symptoms, they should immediately tell their Coach.
- **The student should be evaluated.** A licensed physician of medicine or osteopathic medicine (MD or DO), sufficiently familiar with current concussion management, should examine the student, determine whether the student has a concussion, and determine when the student is cleared to return to participate in interscholastic athletics.
- **Concussed students should give themselves time to get better.** If a student has sustained a concussion, the student's brain needs time to heal. While a concussed student's brain is still healing, that student is much more likely to have another concussion. Repeat concussions can increase the time it takes for an already concussed student to recover and may cause more damage to that student's brain. Such damage can have long term consequences. It is important that a concussed student rest and not return to play until the student receives permission from an MD or DO, sufficiently familiar with current concussion management, that the student is symptom-free.

How can students prevent a concussion? Every sport is different, but there are steps students can take to protect themselves.

- Use the proper sports equipment, including personal protective equipment. For equipment to properly protect a student, it must be:
 - The right equipment for the sport, position, or activity;
 - Worn correctly and the correct size and fit; and
 - Used every time the student Practices and/or competes.
- Follow the Coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.

If a student believes they may have a concussion: Don't hide it. Report it. Take time to recover.

I hereby acknowledge that I am familiar with the nature and risk of concussion and traumatic brain injury while participating in interscholastic athletics, including the risks associated with continuing to compete after a concussion or traumatic brain injury.

Student's Signature _____ Date ___/___/___

I hereby acknowledge that I am familiar with the nature and risk of concussion and traumatic brain injury while participating in interscholastic athletics, including the risks associated with continuing to compete after a concussion or traumatic brain injury.

Parent's/Guardian's Signature _____ Date ___/___/___

SECTION 4: UNDERSTANDING OF SUDDEN CARDIAC ARREST SYMPTOMS AND WARNING SIGNS

What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens blood stops flowing to the brain and other vital organs. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

How common is sudden cardiac arrest in the United States?

There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- dizziness
- lightheadedness
- shortness of breath
- difficulty breathing
- racing or fluttering heartbeat (palpitations)
- syncope (fainting)
- fatigue (extreme tiredness)
- weakness
- nausea
- vomiting
- chest pains

These symptoms can be unclear and confusing in athletes. Often, people confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

What are the risks of practicing or playing after experiencing these symptoms?

There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who have SCA die from it.

Act 59 – the Sudden Cardiac Arrest Prevention Act (the Act)

The Act is intended to keep student-athletes safe while practicing or playing. The requirements of the Act are:

Information about SCA symptoms and warning signs.

- Every student-athlete and their parent or guardian must read and sign this form. It must be returned to the school before participation in any athletic activity. A new form must be signed and returned each school year.
- Schools may *also* hold informational meetings. The meetings can occur before each athletic season. Meetings may include student-athletes, parents, coaches and school officials. Schools may also want to include doctors, nurses, and athletic trainers.

Removal from play/return to play

- Any student-athlete who has signs or symptoms of SCA must be removed from play. The symptoms can happen before, during, or after activity. Play includes all athletic activity.
- Before returning to play, the athlete must be evaluated. Clearance to return to play must be in writing. The evaluation must be performed by a licensed physician, certified registered nurse practitioner, or cardiologist (heart doctor). The licensed physician or certified registered nurse practitioner may consult any other licensed or certified medical professionals.

I have reviewed and understand the symptoms and warning signs of SCA.

Section 8: Re-CERTIFICATION BY LICENSED PHYSICIAN OF MEDICINE OR OSTEOPATHIC MEDICINE

This Form must be completed for any student who, subsequent to completion of Sections 1 through 6 of this CIPPE Form, required medical treatment from a licensed physician of medicine or osteopathic medicine. This Section 8 may be completed at any time following completion of such medical treatment. Upon completion, the Form must be turned in to the Principal, or the Principal's designee, of the student's school, who, pursuant to ARTICLE X, LOCAL MANAGEMENT AND CONTROL, Section 2, Powers and Duties of Principal, subsection C, of the PIAA Constitution, shall "exclude any contestant who has suffered serious illness or injury until that contestant is pronounced physically fit by the school's licensed physician of medicine or osteopathic medicine, or if none is employed, by another licensed physician of medicine or osteopathic medicine."

NOTE: The physician completing this Form must first review Sections 5 and 6 of the herein named student's previously completed CIPPE Form. Section 7 must also be reviewed if both (1) this Form is being used by the herein named student to participate in Practices, Inter-School Practices, Scrimmages, and/or Contests in a subsequent sport season in the same school year AND (2) the herein named student either checked yes or circled any Supplemental Health History questions in Section 7.

If the physician completing this Form is clearing the herein named student subsequent to that student sustaining a concussion or traumatic brain injury, that physician must be sufficiently familiar with current concussion management such that the physician can certify that all aspects of evaluation, treatment, and risk of that injury have been thoroughly covered by that physician.

Student's Name: _____ Age _____ Grade _____

Enrolled in _____ School _____

Condition(s) Treated Since Completion of the Herein Named Student's CIPPE Form: _____

A. GENERAL CLEARANCE: Absent any illness and/or injury, which requires medical treatment, subsequent to the date set forth below, I hereby authorize the above-identified student to participate for the remainder of the current school year in additional interscholastic athletics with no restrictions, except those, if any, set forth in Section 6 of that student's CIPPE Form.

Physician's Name (print/type) _____ License # _____

Address _____ Phone () _____

Physician's Signature _____ MD or DO (circle one) Date _____

B. LIMITED CLEARANCE: Absent any illness and/or injury, which requires medical treatment, subsequent to the date set forth below, I hereby authorize the above-identified student to participate for the remainder of the current school year in additional interscholastic athletics with, in addition to the restrictions, if any, set forth in Section 6 of that student's CIPPE Form, the following limitations/restrictions:

1. _____
2. _____
3. _____
4. _____

Physician's Name (print/type) _____ License # _____

Address _____ Phone () _____

Physician's Signature _____ MD or DO (circle one) Date _____

Section 9: CIPPE MINIMUM WRESTLING WEIGHT

INSTRUCTIONS

Pursuant to the Weight Control Program adopted by PIAA, prior to the participation by any student in interscholastic wrestling, the Minimum Wrestling Weight (MWW) at which the student may wrestle during the season must be (1) certified to by an Authorized Medical Examiner (AME) and (2) established NO EARLIER THAN six weeks prior to the first Regular Season Contest day of the wrestling season and NO LATER THAN the Monday preceding the first Regular Season Contest day of the wrestling season (See NOTE 1). This certification shall be provided to and maintained by the student's Principal, or the Principal's designee.

In certifying to the MWW, the AME shall first make a determination of the student's Urine Specific Gravity/Body Weight and Percentage of Body Fat, or shall be given that information from a person authorized to make such an assessment ("the Assessor"). This determination shall be made consistent with National Federation of State High School Associations (NFHS) Wrestling Rule 1, Competition, Section 3, Weight-Control Program, which requires, in relevant part, hydration testing with a specific gravity not greater than 1.025, and an immediately following body fat assessment, as determined by the National Wrestling Coaches Association (NWCA) Optimal Performance Calculator (OPC) (together, the "Initial Assessment").

Where the Initial Assessment establishes a percentage of body fat below 7% for a male or 12% for a female, the student must obtain an AME's consent to participate.

For all wrestlers, the MWW must be certified to by an AME.

Student's Name _____ Age _____ Grade _____
Enrolled in _____ School _____

INITIAL ASSESSMENT

I hereby certify that I have conducted an Initial Assessment of the herein named student consistent with the NWCA OPC, and have determined as follows:

Urine Specific Gravity/Body Weight _____/_____ Percentage of Body Fat _____ MWW _____

Assessor's Name (print/type) _____ Assessor's I.D. # _____

Assessor's Signature _____ Date ____/____/____

CERTIFICATION

Consistent with the instructions set forth above and the Initial Assessment, I have determined that the herein named student is certified to wrestle at the MWW of _____ during the 20____ - 20____ wrestling season.

AME's Name (print/type) _____ License # _____

Address _____ Phone () _____

AME's Signature _____ MD, DO, PAC, CRNP, or SNP Date of Certification ____/____/____
(circle one)

For an appeal of the Initial Assessment, see NOTE 2.

NOTES:

1. For senior high school wrestlers coming out for the Team AFTER the Monday preceding the first Regular Season Contest day of the wrestling season the OPC will remain open until January 15th and for junior high/middle school wrestlers coming out for the Team AFTER the Monday preceding the first Regular Season Contest day of the wrestling season the OPC will remain open all season.
2. Any athlete who disagrees with the Initial Assessment may appeal the assessment results one time by having a second assessment, which shall be performed prior to the athlete's first Regular Season wrestling Contest and shall be consistent with the athlete's weight loss (descent) plan. Pursuant to the foregoing, results obtained at the second assessment shall supersede the Initial Assessment; therefore, no further appeal by any party shall be permitted. The second assessment shall utilize either Air Displacement Plethysmography (Bod Pod) or Hydrostatic Weighing testing to determine body fat percentage. The urine specific gravity testing shall be conducted and the athlete must obtain a result of less than or equal to 1.025 in order for the second assessment to proceed. All costs incurred in the second assessment shall be the responsibility of those appealing the Initial Assessment.

LAMPETER-STRASBURG SCHOOL DISTRICT

SPORTS EMERGENCY FORM

THIS FORM IS THE EMERGENCY FORM THAT WILL BE KEPT IN THE SPORTS TEAM MEDICAL KIT. PL EASE PRINT CLEARLY IN INK.

Student Name _____ Date of Birth: _____ Grade _____ Sport _____

PERSONAL INFORMATION:

Street Address _____ City _____ Zip Code _____

Home Telephone _____ Parents/Guardians _____

Father's Place of Work _____ Work Phone _____ Cell Phone _____

Mother's Place of Work _____ Work Phone _____ Cell Phone _____

Family Physician _____ Phone _____ Hospital Preference _____ Alternate

Person to Be Responsible for Child _____ Phone _____

INSURANCE COVERAGE:

All students participating in interscholastic athletics are supplied with student accident insurance by the school district with the terms of such covered dictated by the policy on file with the school district. The coverage provided is for an accident on the part of a student while participating in an interscholastic sport. The district supplied coverage is secondary to the parent's coverage.

PARENT/GUARDIAN PERMISSION:

I grant permission for my child to have injuries treated by the athletic trainer and team physician and for medical personnel, at their discretion, to release school health record medical information to those individuals deemed necessary by the medical personnel. If a hospital is necessary, I grant permission to have my child transported to the nearest hospital, and I assume responsibility for fees incurred by such an emergency. I understand that the athletic trainer and the team physician have final authority to clear or to disqualify my child for activity following any injury or illness.

The information provided on this form is true and complete to the best of my knowledge.

PARENT/GUARDIAN SIGNATURE _____ DATE _____

MEDICAL HISTORY:

Please explain any "YES" answers EXPLAIN

Asthma _____

Diabetes YES NO _____

Heart Problems YES NO _____

Vision Problems YES NO _____

Food/Medication/Insect Allergies YES NO _____

History of Heat Illness YES NO _____

Concussion History (dates, symptoms, length of recovery) YES NO _____

Special Medical Conditions (not otherwise listed) _____

Date of Most Recent Tetanus Immunization _____

PARENT/GUARDIAN SIGNATURE _____ DATE _____

**LAMPETER-STRASBURG SCHOOL DISTRICT
SPORTS INJURY PROTOCOL**

Please read the following policies. A signature from parent and student is required.

Sports Injury Protocol

All athletic injuries that occur during participation in school-sponsored sports must be reported to the athletic trainer. No coach may permit a student to return to participation in any athletic activity until the student is evaluated and cleared for return to participation in writing by an appropriate medical professional(s). The Board may designate a specific appropriate medical professional(s) to provide written clearance for return to participation. The District reserves the right to hold any student out of participation in an athletic activity if it is determined that the student is not ready to compete safely. The District should also consider requiring notification of the physical education teacher and removal from physical activity in physical education until written clearance is obtained.

Head Injury/Concussion Protocol

The Lampeter-Strasburg Athletic Department utilizes the computer based concussion management program ImPACT to assist with the supervision of head injuries sustained during athletic participation. The ImPACT test has been designed specifically for the management of sports-related concussions and measures multiple aspects of cognitive functioning, including working memory, sustained and selective attention time, non-verbal problem solving, and reaction time. ImPACT is currently the most widely utilized computerized program in the world and is implemented effectively across high school, collegiate, and professional levels of sport participation. For more information on the ImPACT test, please visit their website: www.impacttest.com

All student-athletes participating in a contact sport will take the ImPACT test prior to the beginning of the season in order to provide a baseline test. If a head injury is sustained during participation, the parent/guardian will be notified as well as the student's physical education teacher. The student will again be tested on the ImPACT system and results compared with the baseline test. If a student shows any signs or symptoms of a concussion, the student will be excluded from athletic participation, including physical education class, until the following requirements are met:

1. The student has no concussion symptoms
2. The student completes an ImPACT test comparable to their baseline test
3. The student is cleared by the Lampeter-Strasburg athletic trainer and team physician.

The Lampeter-Strasburg athletic trainer and the team physician have final authority to clear or to disqualify a student for activity following any injury or illness.

Student-athletes in non-contact sports will not take a baseline ImPACT test. Therefore, if a head injury is sustained during participation, the parent/guardian will be notified as well as the student's physical education teacher. The student will be excluded from participation, including physical education class, until the following requirements are met:

1. The student has no concussion symptoms
2. The student is cleared by the Lampeter-Strasburg athletic trainer and team physician

The Lampeter-Strasburg athletic trainer and the team physician have final authority to clear or to disqualify a student for activity following any injury or illness.

When the previous requirements are met, the student will initiate a 5-day return-to-play plan. This protocol has been developed using guidelines from the 2016 Berlin International Conference on Concussion in Sport.

- Day 1: The student may participate in light aerobic exercise such as jogging or stationary cycling.
- Day 2: The student may participate in more intense aerobic activity such as running sprints.
- Day 3: The student may participate in practice with any non-contact training drills.
- Day 4: The student may participate in a full contact practice.
- Day 5: The student may return to full participation in practice and events.

If any symptoms occur after moving to a given level, the athlete should drop back down to the level at which he or she had been asymptomatic.

Please direct any questions to Jen McCrabb at 464-3311.

PLEASE READ THE BACK PAGE AND RETAIN THIS PAGE FOR FUTURE REFERENCE

PARENT/ATHLETE CONCUSSION INFORMATION SHEET

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by bump, blow, or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports **one or more** symptoms of concussion listed below after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.

Symptoms observed by Coaches

Appears dazed or stunned
Is confused about assignment or position
Forgets an instruction
Is unsure of game, score, or opponent
Moves clumsily
Answers questions slowly
Loses consciousness (even briefly)
Shows mood, behavior, or personality changes
Can't recall events prior to hit or fall
Can't recall events after hit or fall

Symptoms reported by Athletes

Headache or “pressure” in head
Nausea or vomiting
Balance problems or dizziness
Double or blurry vision
Sensitivity to light
Sensitivity to noise
Feeling sluggish, hazy, foggy, or groggy
Concentration or memory problems
Confusion
Just not “feeling right” or “feeling down”

CONCUSSION DANGER SIGN

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull.

An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that not only does not diminish, but gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. **They can even be fatal.**

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, or playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

REMEMBER

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer. It is better to miss one game than the whole season. For more information visit: www.cdc.gov/Concussion.

**LAMPETER-STRASBURG SCHOOL DISTRICT
SPORTS INJURY PROTOCOL**

Please sign and date the following. This must be returned with the completed sports physical. Failure to complete and return this form will exclude the student-athlete from participation. Thank you.

I have read the above description of the Lampeter-Strasburg School District Sports Injury Protocol and the Parent/Athlete Concussion Information Sheet. I fully understand and accept the above description of the Lampeter-Strasburg School District Sport Injury Protocol.
